

TITLE OF RESEARCH

GOALS OF YOUR RESEARCH

- 1) Summarize grand design of your research and metabolomics-specific purpose with figures, tables and references.
- 2) Describe the unique aspect of your research in the field, and expected results and meaning both scholarly and socially.
- 3) Background of your research, for example, research trend.
- 4) How to leverage metabolomics in your research.

RESEARCH PROPOSAL

- 1) Summarize your project.
- 2) Suggest how and when the plan is to be implemented including references and experimental scale such as the number of samples.
- 3) Describe activities planned under this grant including your own idea and supports with references.
